SBA-CERTIFIED SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS (SDVOSB)

A veteran-owned consultancy that moves AI, data, and automation from idea to working systems, led by one principal who has built and led three enterprise AI, data, and analytics practices, plus hands-on delivery of the automations, agents, and pipelines.

CORE COMPETENCIES

- AI and machine learning consulting, AI-readiness assessments, and roadmapping
- Workflow automation and orchestration, including agentic and LLM-driven workflows
- Custom AI agents and assistants scoped and tuned to specific business tasks
- Data analytics, reporting, and self-updating dashboards
- Data pipeline design and systems integration via public and internal APIs
- Cloud and hybrid architecture across AWS, Azure, and GCP
- Vendor-neutral technology strategy, discovery workshops, opportunity sizing, and executive enablement

DIFFERENTIATORS

- **Strategist and builder in one**. Rare to have both practice leadership and hands-on delivery in a single resource.
- **Vendor-neutral**. Recommends fit, not a single product line.
- **Lean and direct**. Low overhead, direct access to the principal, fast turnaround.

COMPANY SNAPSHOT

UEI	NJLEHNAQATJ6
CAGE	22XM3
Founded	2026 · Florida
Location	Punta Gorda, FL

SDVOSB · SBA-certified service-disabled veteran-owned small business · certified 2026, valid through 08/2029

NAICS

Additional	541511 · 541618 · 541990

PSC

Primary	DA01
Also	DD01 · DA10

CERTIFICATIONS

65+ active vendor and technical certifications across AI, data, automation, and analytics (Credly-verified). Detail on request.

DEMONSTRATED CAPABILITY

- **Contract-opportunity monitor:** automation polling the SAM.gov API, filtering by NAICS, set-
- **Scheduled data screener:** a pipeline running weekly via GitHub Actions and publishing results to a public web endpoint.

aside, and keyword, AI fit-scoring, and publishing a live dashboard.

- **AI-agent skill library:** a versioned repository of custom agent skills for research, document generation, and data tasks.
- **brianbeals.com:** a Next.js site on Vercel with CI/CD deploys, demonstrating modern web build and cloud delivery.

Newly formed; no federal past performance yet. The builds above evidence delivery capability; positioned to subcontract under a prime to build a federal record.
