SBA-CERTIFIED SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS · SDVOSB SET-ASIDE ELIGIBLE

What applies. Section 508 of the Rehabilitation Act requires that information and communication technology developed, procured, maintained or used by federal agencies be accessible. There is no compliance date: it is in force now and it governs award eligibility. A solicitation asks for a VPAT, and the answer is due with the bid.

A veteran-owned consultancy that establishes where an organization stands against Section 508 and produces the document a contracting officer asks for: an Accessibility Conformance Report in VPAT 2.5 format, every WCAG success criterion marked and evidenced, dated and signed. Delivered by the principal, a U.S. Navy veteran who founded and led three enterprise AI, data and analytics practices.

Who we serve: federal agencies, and the vendors selling ICT to them who owe a VPAT with the bid.

CORE COMPETENCIES

- **Section 508 Conformance Assessment**. Automated scanning plus manual testing with keyboard and screen reader against WCAG 2.1 AA. Deliverable: an ACR in VPAT 2.5 format, a prioritized roadmap with effort bands, and a one-page summary. Two to four weeks.
- **Vendor VPAT for a Bid**. An independent ACR for a product a solicitation names, scoped to the screens the buyer uses, dated and signed, delivered against the bid date.
- **Document Inventory & Triage**. Catalog every PDF and document across the web properties and classify each: retire, replace, remediate, or leave. Deliverable: a scoped work order a remediation vendor can execute against.
- **Program & Policy Setup**. Accessibility statement, Section 508 program manager designation, procurement language requiring a VPAT or ACR before purchase, and content governance.

DIFFERENTIATORS

- **No product to sell**. No overlay, no platform license, no per-page remediation quota. The recommendation follows the finding.
- **Evaluation only, never the remediation**. A conformance claim written by whoever built or repaired the product is self-assessment. Staying out of the repair is what lets the report mean something, and it gives a remediation vendor a specification to bid against.
- **A tagged PDF is not a conforming PDF**. Most checkers ask whether tags exist. Documents here are validated against ISO PDF/UA with veraPDF and read for headings, table headers and alt text, which is what an auto-tag pass leaves behind.
- **The report says what it did not check**. Reading order, meaningful alt text and focus order are decided by a person and recorded; an unanswered criterion reports as Not Evaluated, never as Supports.
- **SDVOSB set-aside eligible**. Certified by SBA and active in SAM.gov, so the award path is open rather than a subcontract conversation. Available to subcontract the assessment layer under a remediation prime.

PAST PERFORMANCE

- **Brian Beals, LLC (brianbeals.com)**: the firm's own site, 34 pages and 6 documents, evaluated against all 50 WCAG 2.1 A and AA criteria. Every document validated against PDF/UA-1 with veraPDF; remediated to conformance, with no criterion at Partially Supports or Does Not Support. Accessibility Conformance Report in VPAT 2.5 format, re-evaluated October 11, 2026 with scripted and by-ear screen reader testing, published at brianbeals.com/conformance-report.html.
- **Purpose-built evaluation tooling**: automated rule checks plus the ones automation misses (320-pixel reflow, dark-scheme contrast, focus that a skip link fails to move), documents read through their tag tree and validated with veraPDF, results reported as WCAG criteria. A regression suite runs against pages encoding known defects.
- **22 Florida public entities**: verified and sampled across four counties, producing per-entity findings mapped to specific success criteria, with third-party widget defects attributed to the vendor so no agency is handed a finding it cannot act on.
- **Principal**: Brian Beals, U.S. Navy veteran (Electronics Technician). Founded and led three enterprise AI, data and analytics practices from a standing start, running readiness assessments, data and AI governance work, and multi-year technology roadmaps with executive teams. Builds the tooling used here: the evaluation engine, a federal and state opportunities monitor, and scheduled data pipelines on GitHub Actions.

COMPANY DATA

UEI	NJLEHNAQATJ6
CAGE	22XM3
Founded	2026 · Florida
Location	Punta Gorda, FL
Structure	Single-member LLC

HOW TO BUY

Under $15,000	Micro-purchase, purchase card (FAR 2.101)
Up to $5M	SDVOSB sole source (FAR 19.1406)
VA	Vets First, 38 U.S.C. 8127
SAM.gov	Active · UEI, CAGE
SBA	SDVOSB · 08/2026 – 08/2029

NAICS & PSC

541512	Computer Systems Design (primary)
541511	Custom Programming
541519	Other Computer Related
